

# Mikro Admin Reports

New Item Implement Later Hold Cancel

Tracking Needs:

Need:

- Team Activity
  - Project page stats (%edited, tasks remaining, %validated, time per task)
  - **Imagery Collections**
  - **High Level Projects & Editing Trends** - Community Total Projects, Team Total Projects, Team QC Trends, Team Invalidations, Team Validation Totals, Community QC Totals, Community Invalidations, Community Validation Totals, # Trends and Investigations, Changes, Changesets
  - **Impact Algorithms** - Team Success, Community Success, Community Footprint (manual calculations - pending)
- Team Hours
  - Hours - Total Hours (by team and user) + Task Breakdowns
  - Changeset Heatmap & changes / changesets stats
  - **Changeset Timelines?** (in an editor's timecard)
- Team Stats
  - Editing Activity - Kibana
  - **Overwrite & Passive Aggressive Trackers** - Kibana
- Stat Charts (with raw data somewhere)
- Add filters for date ranges, time zones, and users across the whole page.

Want:

- Project Stats - total tasks done + progress from last week
  - I pull stats mostly weekly but also for other reports / analyses, how can I not mess up when it's comparing stats (like if we compared new reports to the last report). Can we add a compare date in the filters?
- Community Report Summaries - AI?
  - My team submits a form via Google Forms which is compiled into a spreadsheet. I need something to summarize various aspects of these reports.
  - Events - Totals, Participant type, Participant #s, Summaries, Projects, Outcome
  - Community Interactions - Total, Outcome, Participant type, Summaries, links
